<u>Lectures and courses in 1977</u>	IV
<u>Instrumental equipment of the laboratory</u>	VIII
<u>Abbreviations employed in references</u>	IX
<u>Papers given at the Swedish-Danish Phonetics Seminar,</u> <u>Copenhagen, November 25-26, 1977</u>	S-1
On slips of the pen (Kerstin Nauclér)	S-3
Stød and syllabicity in a Jutlandic dialect (Peter Molbæk Hansen)	S-15
"Stød" and unexpected substitutions in the speech of Danish 2-year-old children (John Jørgensen)	S-25
On the production of the Swedish tje-sound (Per Lindblad)	S-31
Perception of stationary formant patterns (Hartmut Traunmüller)	S-43
Form factors for power spectra of vowel nuclei (Ulf J. Stålhammar)	S-47
Synthesis of a female voice, a preliminary study (Inger Karlsson)	S-63
Measurements of formant bandwidths in the time domain (Lennart Nord)	S-71
Final lengthening - a consequence of articulatory and perceptual restrictions? (Bertil Lyberg)	S-79
The glottal gesture in some Danish consonants - preliminary observations (Birgit Hutter)	S-87

II

Model experiments on lip, tongue and larynx positions for palatal vowels (Sidney Wood)	S-103
<u>Reports on phonetic analyses of speech</u>	1
A simplified explanation, in physical terms, of the acoustical consequences of tongue and lip movement in vowel production (Nina Thorsen)	1
On the identification of selected Danish intonation contours (Nina Thorsen)	17
On the universal character of phonetic symbolism with special reference to vowels (Eli Fischer-Jørgensen)	75
○ The influence of aspiration on the fundamental frequency in Danish: Some preliminary observations (Niels Reinholt Petersen)	91
<u>Musical acoustics</u>	113
Slit height and blowing pressure as parameters conditioning the function of the clarinet as a quasi-quarter-wave resonator (Niels Bak)	113
