

Miscellaneous (indeterminable)

Mi1, ME 96/0433C, **PE Hx 020**, Square K+Λ+M, Pass 2

Miscellaneous, indeterminable, Type 08. Small fragment with part of one surface preserved. Clay: fine reddish-brown. No fingerprints. Polished. Squarish section? No impressions in fractures. Preserved surface part of small stroke incised. Ø [1.33 × 0.46] Th. [0.35].

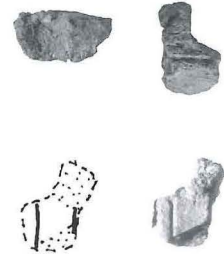

The inscription

]vest.[

Comments: perhaps part of **Cr2**?

Mi2, ME 96/0430D, **PE Hx 021**, Square K, Pass 2

Miscellaneous, indeterminable, Type 08. Fragment with part of two surfaces preserved. Clay: fine reddish-brown. No fingerprints. Polished. On fracture is seen a very fine string mark(?), which, however, could be from a straw; cf. Misc 3. On flat polished surface part of two almost parallel lines incised. Stylus medium to fine. Incision medium. Ø [1.2 × 0.9]. Th. [0.66].

The inscription

]vest[

The inscription consists of two parallel strokes which may belong to one or two signs.

Comments: This fragment may perhaps (because of context) belong to **Cr2**. If the impression in the fracture is from a straw it might perhaps better be understood as the fragment from a clay bar.

Mi3, ME 96/0665F, **PE Hx 023**, Square K, Pass 1

Miscellaneous, indeterminable, Type 08. Small fragment with part of one surface preserved. Clay: hard dark red-brownish – burnt? No fingerprints visible. Polished surface. Inside all fracture (*i.e.* no string marks preserved). On curved surface has part of one curved stroke preserved. Stylus medium, rounded end. Incision medium. Ø [0.86 × 0.59]. Th. [0.46].

The inscription

]vest[

The inscription consists of one deep curved stroke and one light straight stroke. The latter is probably accidental.

Comments: The curved surface would indicate a crescent or less likely a medalion. Part of **Cr2**?

Mi4, ME 97/Misc 3A, **PE Hx 024**, From sieving soil 1997?

Miscellaneous, indeterminate, Type 08. Fragment with part of two surfaces preserved. Clay: fine light red-brownish, worn. No fingerprints. No polish. Inside one fine narrow impression, probably straw; cf. **Mi2**. On one surface, two incised strokes at slightly odd angles. Stylus medium, pointed end. Incision medium. Ø [0.92 × 0.95]. Th. [0.51].

The inscription

]vest[

Comments: Too small to suggest any kind of document.

Mi5, ME 96/1145C, **PE Hx 025**, Square Γ, Pass 3

Miscellaneous, nodule?, fragment with part of two surfaces preserved. Clay: fine light brown-yellowish. Fingerprints. Polished. Inside heavy, crossed strings; cf. **Cr3**. On upper surface, an impression? of object(?) with flat surface displaying faint unclear strokes. (Mpd. 0.7). On side, fingerprints and one incised stroke. Ø [1.31 × 1.06]. Th. [0.88].

The inscription

]vest[

The inscription consists of the fragment of a straight incised stroke.

Comments: The impression is placed where one would expect to find a seal impression, but it is hard to identify as such.

Mi6, ME 97/Misc 2A, **PE Hx 026**, From sieving soil 1997?

Miscellaneous, indeterminate, Type 08. Fragment with part of one surface preserved. Clay: fine reddish-brown. No fingerprints. Some polish. Solid interior, no imprints. On surface part of inscription. Stylus medium to fine with fine rounded end. Incision medium to light. Ø [0.34 × 0.55]. Th. [0.48].

The inscription

]039[or]X-[

Comments: Too small to suggest a kind of document, although a clay bar is most probable.

Mi7, ME 97/0051F, **PE Hx 027**, Square Φ, Pass -

Miscellaneous, indeterminate, Type 08. Small fragment with part of one surface preserved. Clay: dark reddish-brown. No fingerprints preserved. Polished surface. On rounded surface part of a slightly curved stroke preserved. Stylus medium, rounded end. Incision medium to deep. Ø [1.02 × 0.67]. Th. [0.61].

The inscription

]vest[

The inscription consists of one slightly curved stroke.

Comments: The curved surface would indicate a crescent or less likely a medalion.

Mi8, ME 96/Misc 4D, **PE Hx 028**, 1996, sieving of soil

Miscellaneous, indeterminable, Type 08. Small fragment with part of one surface preserved. Clay: light red-brownish with imprints of straw inside. No fingerprints. Some polish. Inside fracture with imprint from straw. Surface incised with fragment of cross and a stroke. The stroke is done by a rather thick stylus, while the cross is fine. Incision medium to light. Ø [0.62 × 0.52]. Th. [0.46].

The inscription

]vest[

Too little preserved to suggest any reading.

Comments: Could perhaps be from clay bar?

Mi9, ME 0967C, **PE Hx 029**, Squares B+H, Pass 2

Miscellaneous, indeterminable. Type 08. Parts of three surfaces preserved. Clay: fine, light red-brownish, patches of black smearing. Faint fingerprints. Polished. Squarish section? Inside all fracture – no string marks. On edge fragment from a seal impression. On one side, a tiny fragment from a second seal impression and on the other side, an incision. If inscription the incision is light; stylus fine and rather pointed. Ø [0.93 × 1.12]. Th. [1.30].

The inscription

]vest[

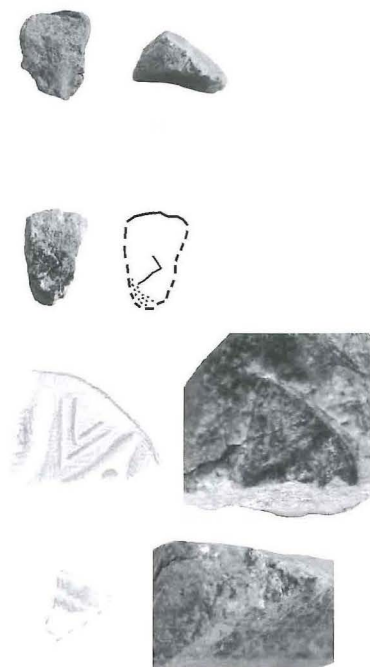

The seal impression, PE 054a

Imperfectly preserved impression from moderately to well-engraved seal with flat surface and circular outline – Petschaft/stamp? Motif: two thick strokes with fine Vs the inside the other, as fill. Ø [0.73 × 0.63]. Est. Ø 1.4.

The seal impression, PE 054b

Tiny fragment from a moderately to well-engraved seal, apparently with flat surface. Only part of a stroke and the beginning of an object preserved. Mpd. *c.* 0.5.

Comments: The inscription is most uncertain. The document is unique. There is a slim possibility that it may be from a broken roundel with an inscription on one side and a seal impression on the other side (cf. **SA Wc 2**).

Mi10, ME 0967A, Squares B+H, Pass 2

Miscellaneous, indeterminable. Type 08. Part of three surfaces preserved. Clay: fine red-brownish. Fingerprints not visible. Polished. Triangular section? Shape unclear. Inside, string marks with knot or more likely a 'Wickelband' (Fig. 72). On top, fragment from a seal impression. Side smoothed and reverse smoothed flat. Ø [1.90 × 1.28]. Th. 1.06.

The seal impression, PE 003

Incompletely preserved impression from a moderately engraved seal with flat surface and circular outline. Stamp. Motif: intertwined double rope design. Ø [0.89 × 0.59].

Comments: Could this be an unusual Type 05? or from a large peg sealing, Type 07A? Same seal found on **D16**.

Mi11, ME 96/0433A, Squares K+Λ+M, Pass 2

Miscellaneous, indeterminate, Type 08. Small fragment with part of two surfaces preserved. Clay: dark brown-reddish, fine-grained. Fingerprints. Polished. Rectangular shape? (has one straight side). No impression from string found in fracture. On upper surface part of seal impression; fingerprints on side. Bottom missing. Ø [1.25 × 0.73]. Th. [0.7].

The seal impression PE 007

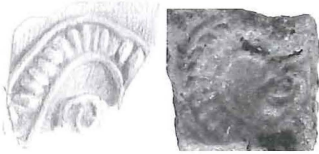

Imperfectly preserved impression from moderately to deeply engraved circular(?) seal apparently with relatively flat surface. Stamp? Motif: dots close to rim with strokes attached. Mpd. [0.75 × 0.5].

Comments: Might also, like **D11**, be a direct sealing, Type 07B? Same seal found on **D11**, **Co6**, and same fabric.

Mi12, ME 0967G, Squares B+H, Pass 2

Miscellaneous, indeterminate. Type 08. Parts of two surfaces preserved. Clay: fine light red-brownish. Polished. No fingerprints visible. Fractured all round. No definite string marks inside. On top fragment from a seal impression, Reverse flat or slightly curved, smoothed – perhaps pressed over object. Ø [1.01 × 0.75]. Th. [0.48].

The seal impression PE 058

Imperfectly preserved impression from moderately to well-engraved seal with slightly curved surface, and no edge preserved; Motif: curved object with cross-bars attached to another object. Ø [0.85 × 0.75].

Comments: Could well be a Type 7C (like **D25** etc.).

Mi13, ME 0967H, Squares B+H, Pass 2

Miscellaneous, indeterminate. Type 08. Parts of two surfaces preserved. Clay: fine, light red-brownish. Polished. Inside fracture, and unclear string marks. On top, fragment from a seal impression, while the side has clear fingerprints. Reverse missing. Ø [0.93 × 0.83]. [0.57].

The seal impression PE 059

Imperfectly preserved impression from moderately to well-engraved seal with slightly curved surface, and no edge preserved. Motif: curved object and straight strokes. Ø [0.9 × 0.52].

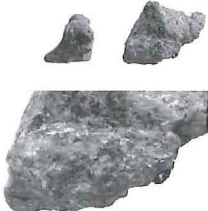

Comments: Could perhaps be Type 04 or 07C?

Mi14, ME 0967N, Squares B+H, Pass 2

Miscellaneous, indeterminate. Type 08. Parts of two surfaces preserved. Clay: fine, light red-brownish, little black smearing. Polished. No fingerprints preserved. Triangular section? Inside fracture, no string mark preserved. On top fragment from possible seal impression. Reverse is smoothed flat. Ø [1.22 × 0.84]. Th. [0.67].

The seal impression PE 064

Imperfectly preserved impression from relatively deeply engraved seal with slightly curved surface, and no edge preserved. Motif: part of object (animal? The preserved outline of the animal's back fits exactly with that on seal PE 019). Ø [0.54 × 0.60].

Comments: Angle of seal face pronounced compared to reverse.

Mi15, ME 96/Misc 4C, 1996, sieving of soil

Miscellaneous, indeterminate, Type 08. Small fragment with part of one surface preserved. Clay: light red-brownish, fine. No fingerprints preserved. Polished. Inside fracture (no string marks visible). On top is the fragment of a seal impression. Side polished. Reverse missing. Ø [1.20 × 0.65]. Th. [0.40].

The seal impression, PE 049

Imperfectly preserved impression from moderately deeply engraved circular(?) seal with slightly curved surface. Part of edge preserved. Discoid? Motif: indeterminate motif – part of animal? Mpd. 0.8.

Mi16, ME 96/Misc 4F, 1996, sieving of soil

Miscellaneous, indeterminate, Type 08. Tiny fragment with part of one surface preserved. Clay: Fine brown-reddish, traces of black smearing. No fingerprints. Polished. Inside fracture (no string marks). On top is the fragment of a seal impression. Ø [0.76 × 0.62]. Th. [0.23].

The seal impression, PE 050

Imperfectly preserved impression from moderately deeply engraved seal with slightly curved surface. No part of edge preserved. Motif: very likely part of quadruped to right. Part of body, neck and one leg preserved; also part of object above back. Mpd. 0.76.

Mi17, ME 96/Misc 4G, 1996, sieving of soil

Miscellaneous, indeterminate, Type 08. Tiny fragment with part of one surface preserved. Clay: fine brown-reddish. No fingerprints. Polished. Inside fracture (no string mark). On top is the fragment of a seal impression. Ø [0.74 × 0.45]. Th. [0.28].

The seal impression PE 051

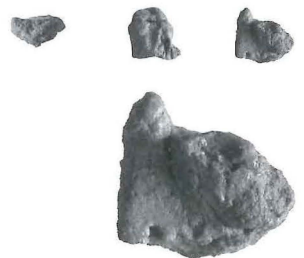

Imperfectly preserved impression from relatively deeply engraved seal. No part of edge preserved. Motif: indeterminate. Part of hieroglyph? Mpd. 0.74.

Mi18, ME 96/Misc 4J, 1996, sieving of soil

Miscellaneous, indeterminate, Type 08. Tiny fragment with part of two surfaces preserved. Clay: fine red-brownish. No fingerprints. Polished. Inside possible traces of string mark. On top are markings which may be from a seal impression. Ø [0.75 × 0.75]. Th. [0.40].

The seal impression: Perhaps part of an object; if from a seal it was deeply engraved. No edge preserved. Mpd. 0.5.

Mi19, ME 96/Misc 4I, 1996, sieving of soil

Miscellaneous, nodule? Type 08. Tiny fragment with part of two surfaces preserved. Clay: fine light red-brownish. No fingerprints. Polished. Inside, clear impression from one thick and one very thin string. On top, probably part of a seal impression. Ø [0.77 × 0.45]. Th. [0.27]

The seal impression, PE 052

Imperfectly preserved impression from deeply engraved seal. No part of edge preserved. Motif: one indeterminable stroke clearly visible. Mpd. 0.67.

Mi20, ME 96/Misc 4K, 1996, sieving of soil

Miscellaneous, indeterminable, Type 08. Tiny fragment with part of one surface preserved. Clay: fine light brown. No fingerprints. Polished. Inside fracture (no string mark). On top most likely tiny fragment of a seal impression. Ø [0.46 × 0.47]. Th. [0.27].

The seal impression, PE 053

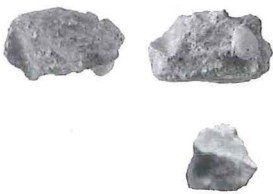

Imperfectly preserved impression from moderately engraved seal. No part of edge preserved. Motif: possibly four radiating strokes.

Mi21, ME 96/0433G, Square K+Λ+M, Pass 2

Nodule, indeterminable, Type 08. Fragment with part of two surfaces preserved. Clay: fine, dark reddish-brown. Fingerprints. Polished. Inside/reverse string and knot identical to **Co28** and very similar to **Co9**, **Co11** and **Co7** (Fig. 73) – clear fibres. Fingerprints on edge. Ø [1.45 × 0.90]. Th. [0.64].

Comments: This fragment is probably a Type 05A (based on the knot).

Mi22, ME 97/0025D, Square P, Pass 2

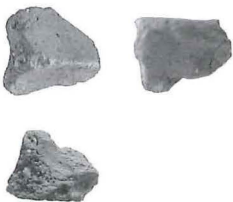

Nodule? indeterminable, Type 08. Fragment with part of two surfaces preserved. Clay: dark brown-reddish. Fingerprints not visible. Some polish. Slightly rounded shape. Triangular? profile. Inside, a large very smooth angular object running obliquely through nodule. Reverse smoothed flat. Ø [1.50 × 0.89]. Th. [0.88].

Mi23, ME 96/0433D, Square K+Λ+M, Pass 2

Miscellaneous, unfinished document? Type 08. Fragment with part of two surfaces preserved. Clay: dark brown-reddish, fine-grained. Clear fingerprints. Polished. Flat-domed profile. Inside fracture, no string marks. Upper side with clear fingerprints. Reverse flat surface – perhaps pressed on wood. Ø [1.30 × 1.04]. Th. [0.58].

Comments: Possibly lump.

Mi24, ME 96/0389D, Square Σ, Pass 1

Miscellaneous, indeterminable, Type 08. Fragment with part of two surfaces preserved. Clay: brown-reddish finely gritted. Fingerprints. Some polish? Wedge-shaped. Triangular profile, very marked edge between the two surfaces. Inside fracture + pressed against some curved smooth surface. One surface with fingerprints, the other smoothed flat. Ø: [1.2 × 1.05]. Th. [0.9].

Comments: Possibly from a peg sealing (Type 07A)?

Mi25, ME 0967O, Squares B+H, Pass 2

Miscellaneous, indeterminate. Type 08. Parts of three surfaces preserved. Clay: fine, light brown-reddish. Polished. Squarish section? Inside impression from small peg? and string. Upper surface missing. Very clear fingerprints on side. Reverse smoothed, slightly curved. Ø [1.32 × 1.03]. Th. [0.9].

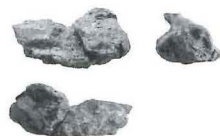

Comments: Possibly Type 5A.

Mi26, ME 0967P, Squares B+H, Pass 2

Nodule, indeterminate. Type 08. Parts of possibly three surfaces preserved. Clay: fine red-brownish, extensive black smearing. Polished. Fingerprints not visible. Squarish section? Inside impression from two parallel strings. Not much preserved from sides and obverse. Reverse is smoothed and slightly rounded. Ø [1.63 × 0.88]. Th. [0.67].

Comments: Part of upper surface probably preserved (black smearing).

Mi27, ME 0967Q, Squares B+H, Pass 2

Nodule, indeterminate. Type 08. Parts of two surfaces preserved. Clay: fine, light brown-reddish. Slightly polished. Inside impression from single string. Preserved surface has faint fingerprints. Ø [1.00 × 1.10]. Th. [0.55].

Comments: Possibly side of large Type 4 nodule?

Mi28, ME 97/0030B, Square II, Pass 2

Miscellaneous, indeterminate, Type 08. Fragment with part of two surfaces preserved. Clay: fine, dark reddish-brown. No fingerprints. Polished. Rectangular shape. No string marks in fractures. One surface with possible trace of stroke and dot. Ø [0.98 × 1.23]. Th. 1.12.

Comment: Possibly unfinished clay bar.

Mi29, ME 96/0430E, Square K, Pass 2

Miscellaneous, indeterminate, Type 08. Fragment with part of one surface preserved. Clay: fine dark reddish-brown. No fingerprints. Polished. Triangular profile? Inside fracture, no impressions. Small accidental cracks? on preserved surface. Ø [1.13 × 1.0]. Th. [1.04].

Comments: Possibly part of Cr2?

Mi30, ME 0967S, Squares B+H, Pass 2

Miscellaneous, indeterminate. Type 08. Parts of possibly two surfaces preserved. Clay: fine, dark brown-reddish. Some polished. The inside has a possible impression from two crossed strings, cf. 0603B, 0040B and 0444B. Obverse is missing. The side has fingerprints. The document may perhaps have been pressed over small peg. Ø [0.92 × 0.86]. Th. [0.51].

Comments: Possibly Type 07?

Mi31, ME 0967T, Squares B+H, Pass 2

Miscellaneous, indeterminate. Type 08. Part of one surface preserved. Clay: fine red-brownish, black smearing. Polished. Fingerprints not visible. Fractured all round. Inside fracture – no string marks. Obverse missing. Reverse apparently smoothed flat. Ø [0.82 × 0.55]. Th. [0.63].

Comments: There is black smearing in fracture: broken before fire.

Mi32, ME 96/0665H, Square E, Pass 1

Miscellaneous, indeterminate, Type 08. Small fragment with part of one surface preserved. Clay: fine, dark brown-reddish. No fingerprints. Some polish. Inside only fracture, no impressions. On surface, an accidental(?) incision. \O [1.18 \times 0.86]. Th. [0.61].

Comments: If the incision is from an inscription it was not very deeply incised; the end of the stylus was not very pointed.

Mi33, ME 96/0665I, Square E, Pass 1

Miscellaneous, indeterminate, Type 08. Small fragment with part of two surfaces preserved. Clay: fine red-brownish, area with black smearing. No fingerprints. Polished. Two fine scratches on surface. Inside, only fracture, *i.e.* no string marks. \O [0.87 \times 0.68]. Th. [0.53].

Comments: The preserved shape/profile indicates that this fragment may be from a crescent.

Mi34, ME 96/0835E, Square H, Pass 1

Miscellaneous, indeterminate, Type 08. Small fragment with part of two surfaces preserved. Clay: fine, dark red-brownish. Fingerprints, some polish. Rounded shape? Irregular profile. Inside fracture (no string mark). On top there is a depression, while the side has fingerprints. Reverse missing. \O [1.17 \times 0.68]. Th. [0.58].

Mi35, ME 96/Misc 4H, 1996, sieving of soil

Miscellaneous, indeterminate, Type 08. Tiny fragment with part of one surface preserved. Clay: fine brown-reddish. No fingerprints, polished. Inside fracture (no string mark). On top a dot with a cross – from seal impression? \O [0.70 \times 0.56]. Th. [0.26].

Comments: The impression shows a dot with a cross. If from a seal it was deeply engraved.

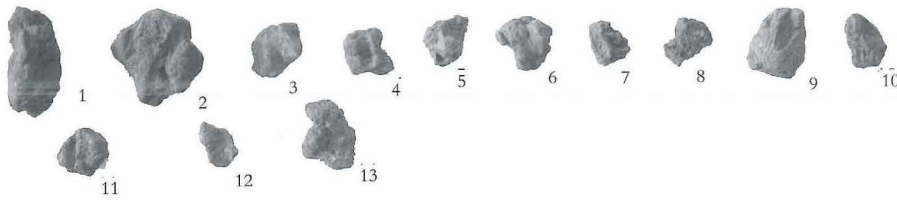

Mi36, ME 96/Misc 4L, 1996, sieving of soil

Miscellaneous, indeterminate, Type 08. Tiny fragment with part of one(?) surface preserved. Clay: fine brown-reddish. No fingerprints. Polish uncertain. Inside, two string marks meeting in V-shape. On top, thin lines. Bottom missing. \O [0.74 \times 0.39]. Th. [0.39].

Mi37, ME 96/Misc 4M, 1996, sieving of soil

Miscellaneous, indeterminate, Type 08. Two tiny fragments with part of one surface preserved. Clay: one dark brown-reddish, the other one reddish-brown. Both appear to be from the side of a larger nodule and both have clear fingerprints. Inside fracture (no string marks visible). \O [0.94 \times 0.70]. Th. [0.30] and \O [0.76 \times 0.68]. Th. [0.38].

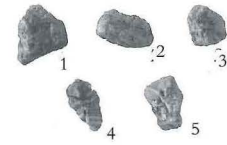

Mi38, ME 96/Misc 4N, 1996, sieving of soil

Miscellaneous, nodules?, Type 08. Thirteen tiny fragments with string marks preserved. Clay: 1 and 2 dull brown earthy. Rest is usual archive clay. The strings marks indicate mainly fine parallel or crossed strings. Nos. 3, 9, 10 and 13 have also part of a surface preserved. Mpd: 1 1.47; 2 1.26; 3 0.86; 4 0.79; 5 0.75; 6 0.77; 7 0.61; 8 0.70; 9 0.97; 10 0.80; 11 0.75; 12 0.66; 13 0.97.

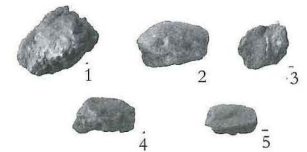

Mi39, ME 96/Misc 4O, 1996, sieving of soil

Miscellaneous, indeterminate, Type 08. Five tiny fragments with part of one surface preserved. Clay: the usual fine red-brownish, all with traces of black smearing. No fingerprints. All appear polished. Mpd: 1 0.78; 2 0.78; 3 0.58; 4 0.74; 5 0.74.

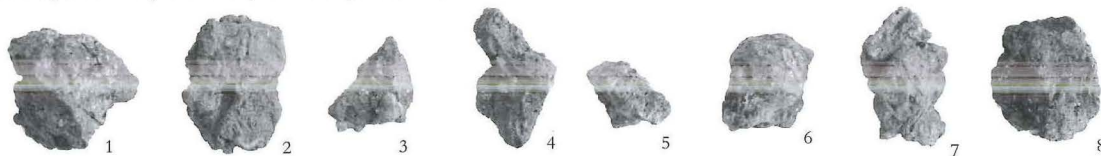

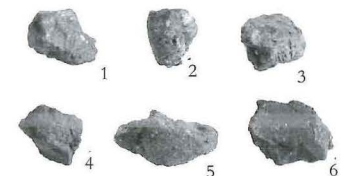

Mi40, ME 96/Misc 4P, 1996, sieving of soil

Miscellaneous, indeterminate, Type 08. Five tiny fragments with part of a significant surface preserved, see below. 1. Dark brown-reddish clay. Side. Ø [1.40 × 0.54]. Th. [0.54]. 2. Light red-brownish, two surfaces (Type 4?). Ø [0.98 × 0.58], Th. [0.63]. 3. Dark brown-reddish, two surfaces (Type 5?). Ø [0.75 × 0.53]. Th. [0.50]. 4. Dark brown-reddish, one surface with possible seal impression. Ø [0.80 × 0.52]. Th. [0.45]. 5. Light brown-reddish, one surface with possible seal impression. Ø [0.68 × 0.42]. Th. [0.33].

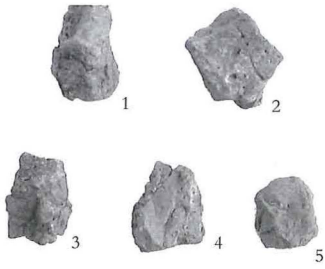

Mi41, ME 0967V, Squares B+H, Pass 2

Miscellaneous, indeterminate. Type 08. Six fragments different clays though all recognisable as document clay. a-c: almost rounded in section, same type as 1196; d with a possible curved surface (peg?); e has two parallel curved sides, pot sherd? f one flat smoothed surface. None with string marks. Mpd. 1. 1.00; 2. 0.88; 3. 0.90; 4. 0.86; 5. 1.42; f. 1.20.

Mi42, ME 0967Z, Squares B+H, Pass 2

Miscellaneous, indeterminate. Type 08. Eight fragments, all with the usual fine red-brownish clay, few with some black smearing. All have irregular surfaces and/or irregular string marks – all probably due to some kind of straw. None have any recognisable characteristics. Mpd 1. 1.77; 2. 1.85; 3. 1.47; 4. 1.90; 5. 1.20; 6. 1.57; 7. 1.85; 8. 1.73.

Mi43, ME 0967X, Squares B+H, Pass 2

Miscellaneous, indeterminate, Type 08. Five fragments with very fine yellow-pinkish clay, one piece (a) with some black smearing. With the exception of a there are no surfaces preserved. All solid clay, same clay as found on the clay bar **Hh 016**. Mpd. 1. 1.45; 2. 1.36; 3. 1.30; 4. 1.30; 5. 1.07.

Mi44, ME 96/Misc 4Q, 1996, sieving of soil

Miscellaneous, indeterminate, Type 08. Minute insignificant fragments numbering 74 most fractured on all sides, some with remains of one surface. All pieces are archive clay. None with fingerprints. Some with remains of polish. Mpd. from 0.8 to 0.4.

Mi45, ME 96/0967Y, Squares B+H, Pass 2 (no photo)

Miscellaneous, indeterminate, Type 08. Small pieces (38) in the usual document clay, mostly fractured all round. Some with part of one surface preserved. Mpd. varies from 1.42 to 0.60.

Mi46, ME 97/0030C, Square P, Pass 2

Miscellaneous, indeterminate, Type 08. Fragment with part of one(?) surface preserved. Clay: fine reddish-brown. No fingerprints. Polish? Fractured, no string marks. Mpd. [1.1]. Th. [0.35].

Comments: Perhaps piece like **D19**?

Mi47, ME 97/0045, Square II, Pass 3

Miscellaneous, indeterminate, Type 08. Small fragment with no surfaces preserved. Clay: fine reddish-brown. No fingerprints. No polish. No imprints. Fractured all round. Ø [1.42 × 1.04]. Th. [0.80].

Mi48, ME 96/0665, Square E, Pass 1

Miscellaneous, indeterminate, Type 08. Three small fragments, each with part of one surface preserved. On the surfaces are faint incisions which may or may not be from incised strokes.

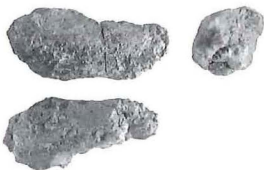

Comments: Fragments with possible incised strokes.

Mi49, ME 97/0005, Square N, Pass -

Miscellaneous, direct? Type 08. Fragment with part of one surface preserved. Clay: fine reddish-brown, burnt black on reverse. Apart from reverse, only fracture. On reverse impression from a single flat string. Ø [0.61 × 0.60]. Th. [0.38].

Comments: Probably direct sealing since the clay has been burnt black by the string.

Mi50, ME 96/1196A, Square BA, Pass 1

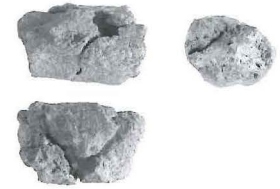

Miscellaneous, indeterminate, Type 08. Fragment with part of three surfaces preserved. Clay: fine reddish-brown, black smearing. Fingerprints not visible. Polished. Square shape? Profile: disc with angle edges. Inside fracture; no impressions. Reverse/top flat. Ø [2.06 × 0.95]. Th. 0.75.

Comments: probably a small rod – no document?

Mi51, ME 96/1196B, Square BA, Pass 1

Miscellaneous, indeterminate, Type 08. Fragment with part of three surfaces preserved. Clay: fine light brown-reddish. Fingerprints. Some polish. Square shape. Profile: disc with angle edges. Inside fracture, no impressions. Reverse/top flattish. Ø [1.66] \times 0.87. Th. 0.97.

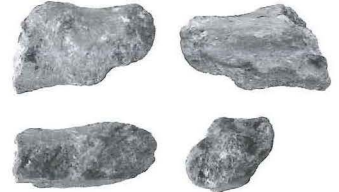

Comments: Probably type like **Mi50** – part of small rod?

Mi52, ME 96/1196E, Square BA, Pass 1

Miscellaneous, indeterminate, Type 08. Fragment with part of three surfaces preserved. Clay: fine light brown-reddish. Faint fingerprints. Some polish. Oblong shape, squarish section. Solid interior, no impressions. Reverse/top slightly groove-like. Ø [1.90] \times 1.23. Th. 0.78.

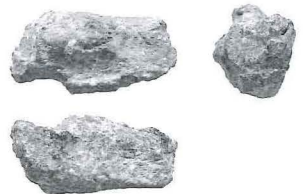

Comments: Probably type like **Mi50**, **Mi51**. Perhaps same as 1196B (no join).

Mi53, ME 96/1196F, Square BA, Pass 1

Miscellaneous, indeterminate, Type 08. Fragment with part of three surfaces preserved. Clay: fine light brown-reddish, black smearing, also in fracture. Fingerprints. Some polish. Oblong shape, squarish profile. Solid interior, no impressions. Ø [2.26] \times 1.18. Th. 0.91.

Comments: Same type as 1196A, B and E – part of small rod?

Mi54, ME 0967R, Squares B+H, Pass 2

Miscellaneous, indeterminate. Type 08. Parts of three surfaces preserved. Clay: fine red-brownish. Polished. Squarish shape? Domed section? Inside impression of string starting at reverse. Faint fingerprints on side. Reverse flat with small edge. Ø [0.95 \times 0.77]. Th. [0.63].

Comments: Perhaps not document.

Mi55, ME 96/0835C, Square H, Pass 1

Miscellaneous, Bar? Type 08. Small fragment with three surfaces preserved. Clay: fine, light brown-reddish. No fingerprints. Polished. Oblong shape. Triangular profile. Solid interior. Reverse smoothed flat. Ø [1.77] \times 0.83. Th. 0.49.

Comments: Unusual piece in this collection – recalls a few of the Psathi-teniakia, Type 5, cf. Mytilineou & Hallager 2000, 52.

Mi56, ME 96/0834&36I, Square H, Pass 1

Miscellaneous, unfinished document? Type 08. Almost completely preserved. Clay fine, light brown-reddish. No fingerprints visible. No polish visible. Rounded shape. Pear-shaped profile. Solid interior, pierced at top. Ø 2.26 \times 2.03. Th. 1.45.

Comments: Glued to almost complete document in 2001. Appears as if it could be a very small medallion. Particularly resembles a small pendant rather than an administrative document.
