Supporting Materials

Harlequin Ducks *Histrionicus histrionicus* show a strong long-term response to conservation measures in overseas North Atlantic French islands

Table S1. Number of Harlequin Ducks recorded in March on Saint-Pierre and Miquelon archipelago during land- and boat-surveys, 2020–2025. See Fig. 2 for the location of the land-based and boat-based surveys.

Year	Land-based	Boat-based	Total
2020	–	187	–
2021	487	796	1,283
2022	536	1,002	1,538
2023	614	1,243	1,857
2024	570	1,156	1,726
2025	547	1,355	1,902
