

FORBRUGSSTRUKTUREN I DANMARK

I 1955 gennemførte *Det statistiske Departement* en forbrugsundersøgelse. Undersøgelsen omfattede 3100 husstande og var således betydelig større end nogen af de tidligere, tilsvarende undersøgelser. Også bedømt efter international målestok er de indsamlede oplysninger af usædvanligt omfang. En del af undersøgelsens resultater er allerede eller vil i nær fremtid blive offentliggjort af *Det statistiske Departement*. Man har imidlertid ønsket at gennemføre mere vidtgående bearbejdninger, og med henblik herpå er et samarbejde mellem *Det statistiske Departement*, *Københavns Universitets Statistiske Institut* og *Københavns Universitets Økonomiske Institut* blevet påbegyndt. Forberedende undersøgelser tyder på, at man med udbytte vil kunne gennemføre en regressionsanalyse til bestemmelse af de såkaldte Engelkurver (som viser sammenhængen mellem forbrugernes indkomst og udgiften til de forskellige varer). Idet man arbejder med 20 à 25 varegrupper og 12 sociale grupper, og idet man må anse det for ønskeligt at arbejde med en række alternative hypoteser (formentlig 6 alternativer) m.h.t. Engelkurvernes form, vil planen kræve op mod et par tusind regressionsanalyser. Når man derefter ydermere håber at gennemføre disse regressionsanalyser med anvendelse af et par forskellige omregninger til »forbrugsenheder«, kan man komme op på måske 3 à 4000 regressionsanalyser. De hertil hørende beregninger ville tidligere have været praktisk næsten uoverkommelige eller i det mindste meget tidskrævende. Det er imidlertid nu muligt at henlægge hele beregningsarbejdet til den nybyggede elektroniske regnemaskine (DASK).

Arbejdet må formodes at strække sig over et par år. Professor, dr. phil. A. Hald og professor, dr. polit. P. Nørregaard Rasmussen medvirker ved undersøgelsen.

Til dækning af omkostningerne ved den nævnte bearbejdelse på DASK har Københavns Universitets Statistiske Institut og Københavns Universitets Økonomiske Institut i fællesskab ansøgt *Statens almindelige Videnskabsfond* om en bevilging.

LITTERATUROVERSIGT

Fortegnelsen er opstillet på grundlag af, hvad der anskaffes af biblioteker her i landet, og oplysninger i tidsskrifts- og forlagspublicationer. For hvert skrift oplyses forfatter, titel, udgivelsessted og -år, og så vidt muligt sideantal og pris. Endvidere angives, på hvilket bibliotek publikationen ved listens offentliggørelse eventuelt befinner sig; manglende biblioteksangivelse forhindrer således ikke, at bogen evt. senere vil være tilgængelig på et bibliotek. Der anvendes følgende forkortelser: Det kgl. Bibliotek (KB), Handelshøjskolens bibliotek (HB), Universitetets økonomiske institut (Ø), Statistisk Departements bibliotek (Sta), Arbejderbevægelsens bibliotek og arkiv (Ar) og Landbohøjskolens bibliotek (L).

Oversigterne udarbejdes af bibliotekar ved Det kgl. Bibliotek, cand. polit. Knud Erik Svendsen.
