

OJS 2.4.2.0 – Nyheder

1. Der er nu mulighed for at tilknytte et billede til den enkelte artikel, så det vises både under det pågældende nummers indholdsfortegnelse og på artiklens resuméside. Hidtil har det kun været muligt at indsætte et billede på det enkelte nummers forside. Indsættelsen kan udføres af forfatteren under upload af manuskript, 'Step 3 - Enter metadata', eller af redaktøren under 'Summary – Edit metadata'.

Figur 1: Metadata – Billede til den enkelte artikel

Resultatet kan se ud som følger:

Figur 2: Arkivoversigt. Her relaterer billederne sig til de enkelte numre og altså ikke til artiklerne

På det enkelte nummers side med indholdsfortegnelsen (Table og Contents) kan det se således ud:

The screenshot shows a journal website interface. At the top, there is a navigation menu with links: HOME, ABOUT, USER HOME, CATEGORIES, SEARCH, CURRENT, ARCHIVES, ANNOUNCEMENTS, and OPEN JOURNAL SYSTEMS. Below the menu is a breadcrumb trail: Home > Archives > Vol 1, No 1 (2013). The main heading is "Vol 1, No 1 (2013)". Underneath, there is a section for "Full Issue" with a link to "View or download the full issue" and a "PDF (DANISH)" link. The "Table of Contents" section is titled "Articles" and lists two articles:

- Statsbibliotekets læsesal** by Niels Erik Frederiksen. Includes a thumbnail image of a library reading room. Links: PDF (DANISH), REMOTE (DANISH).
- Boqstolen** by Niels Erik Frederiksen. Includes a thumbnail image of a person sitting at a table. Link: PDF (DANISH).

On the right side of the page, there are several utility sections:

- Journal Help**
- USER**: You are logged in as... nef. Links: My Journals, My Profile, Log Out.
- SUBSCRIPTION**: My Subscriptions
- NOTIFICATIONS**: View (72 new), Manage
- LANGUAGE**: English (dropdown menu)
- JOURNAL CONTENT**: Search (input field), All (dropdown menu), Search (button)

Abstract

Test

Figur 4: Abstract-side

2. OJS giver nu mulighed for at vælge en opsætning, hvor en særskilt sektion kan indeholde hele tidsskriftsnummeret. Dette valg foretages af redaktøren på siden 'Table of Contents'. Vælg linket 'ISSUE GALLEY'.

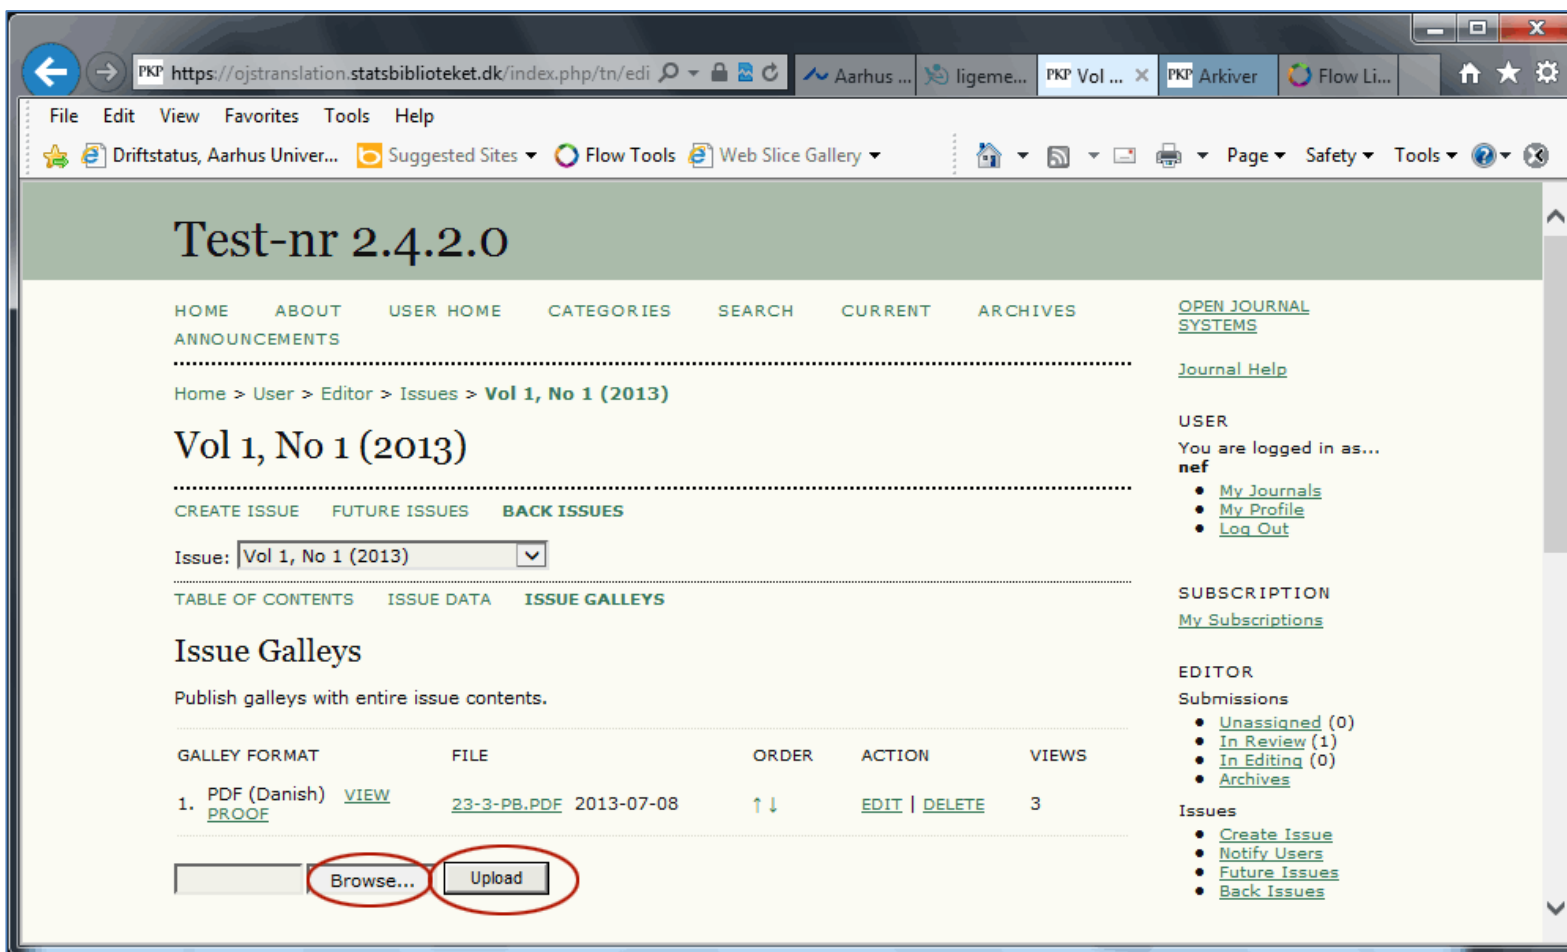

The screenshot shows the OJS interface for editing a journal issue. The main heading is 'Test-nr 2.4.2.0'. The page title is 'Vol 1, No 1 (2013)'. The 'ISSUE GALLEYS' link is circled in red. The table of contents is as follows:

	AUTHORS	TITLE	PAGES	REMOVE	PROOFED
↑ ↓	Frederiksen	STATSBIBLIOTEKETS LÆSESAL		<input type="checkbox"/>	<input type="checkbox"/>
↑ ↓	Frederiksen	BOGSTOLEN		<input type="checkbox"/>	<input type="checkbox"/>

Buttons: Save (green), Unpublish Issue (grey).

Figur 5: Upload hele nummeret

På den efterfølgende side hentes og overføres filen, som indeholder hele nummeret

Figur 6: Indsæt hele nummeret via knapperne 'Browse' og 'Upload'

Over indholdsfortegnelsen er der nu en sektion med link til hele nummeret:

4. I tidligere udgaver skulle man, som tidsskriftschef, aktivere opkoblingen til DOI under 'Journal Management' > 'Setup' > 'Details (Step 1)' – '1.1 General Information'. Nu foregår det via et plug-in ('System Plugins' > 'Public Identifier Plugins' > 'DOI' – 'SETTINGS');

Test-nr 2.4.2.0

HOME ABOUT USER HOME CATEGORIES SEARCH CURRENT ARCHIVES
ANNOUNCEMENTS

Home > User > Journal Management > Plugin Management > **Public Identifier Plugins**

Public Identifier Plugins

These plugins implement support for a public identifier.

URN

This plugin enables the assignment of the Uniform Resource Names to the objects (issues, articles, galley and supplementary files) in OJS.
[ENABLE](#) [UPGRADE PLUGIN](#) [DELETE PLUGIN](#)

DOI

This plugin enables the assignment of the Digital Object Identifiers to issues, articles, galleys and supplementary files in OJS.
[DISABLE](#) [SETTINGS](#) [UPGRADE PLUGIN](#) [DELETE PLUGIN](#)

Figur 9: Public Identifier Plugins

Via det nye plug-in kan man foretage mere detaljerede tilvalg end i tidligere OJS-udgaver. På <http://ojs.statsbiblioteket.dk> vil DOI-opkoblingen blive foretaget af Statsbiblioteket og ikke af de enkelte tidsskriftsredaktioner.

Test-nr 2.4.2.0

HOME ABOUT USER HOME CATEGORIES SEARCH CURRENT ARCHIVES ANNOUNCEMENTS

Home > User > Journal Manager > System Plugins > DOI Plugin Settings

DOI Plugin Settings

Please configure the DOI plug-in to be able to manage and use DOIs in OJS:

Journal Content * Please select the publishing objects that will have Digital Object Identifiers (DOI) assigned:

- Issues
- Articles
- Galleys
- Supplementary Files

DOI Prefix * The DOI Prefix is assigned by registration agencies (e.g. [CrossRef](#)) and is in the format 10.xxxx (e.g. 10.1234):

DOI Suffix A DOI suffix can take any form, but must be unique among all publishing objects with the same DOI prefix assigned:

- Use the pattern entered below to generate DOI suffixes. Use %j for journal initials, %v for the volume number, %i for the issue number, %Y for the year, %a for the OJS article ID, %g for the OJS galley ID, %s for the OJS supplementary file ID and %p for the page number.
 - for issues
 - for articles
 - for galleys
 - for supplementary files.

For example, vol%viss%ipp%p could create a DOI such as 10.1234/vol3iss2pp230
- Use default patterns.
 - %j.v%vi%i for issues
 - %j.v%vi%i.%a for articles
 - %j.v%vi%i.%a.g%g for galleys
 - %j.v%vi%i.%a.s%s for supplementary files.
- Use the "Custom Identifier" for published items as the DOI suffix (must be enabled in Step 4). This is the same identifier that will be used for public URLs.
- Enter an individual DOI suffix for each published item independent and different from the "Custom Identifier" mentioned in the previous option. You'll find an additional DOI input field on each item's meta-data page.

If you change your DOI configuration, DOIs that have already been assigned will not be affected. Once the DOI configuration is saved, use this button to clear all existing DOIs so that the new settings will take effect with existing articles.

Save Cancel

* Denotes required field

Figur 10: DOI Plugin Settings

5. Nu har redaktøren mulighed for, under layoutdelen, at linke til eksterne satsskibe (manuskripter, videoer mm.) og supplerende filer. Denne mulighed bør man dog kun udnytte, når det er absolut nødvendigt. Alle eksterne downloads vil nemlig ikke blive talt med i den løbende statistik over antal brugere/læsere, så jo flere eksterne links, des "dårligere" statistik.

- Under 'Journal Manager' > 'Setup' > 'The Look' > '5.1 Journal Homepage Header' er det blevet muligt at indsætte et miniaturebillede (thumbnail). Dette billede vil fremtræde ved siden af tidsskriftets titel på vores fælles indgangsside, hvilket vil kunne skabe rod på sidens opsætning, så det skal I helst ikke tage i brug. Her følger vi den samme politik, som vi har anvendt i forbindelse med feltet 'Tidsskriftsbeskrivelse' (5.2). Tekst, der skrives i dette felt vil ligeledes optræde på den fælles OJS-indgangsside, hvorved den enkle og overskuelige fremtoning går tabt. Det efterfølgende felt 'Yderligere indhold' kan derimod frit anvendes.

5.1 Journal Homepage Header

A graphic version of the journal's title and logo (as a .gif, .jpg, or .png file) can be uploaded for the homepage, which will replace the text version that otherwise appears.

Journal title

Title text

Title image

Journal Logo

Logo image

Journal thumbnail

Thumbnail

5.2 Journal Homepage Content

By default, the homepage consists of navigation links. Additional homepage content can be appended by using one or all of the following options, which will appear in the order shown. Note that the current issue is always accessible through the Current link in the navigation bar.

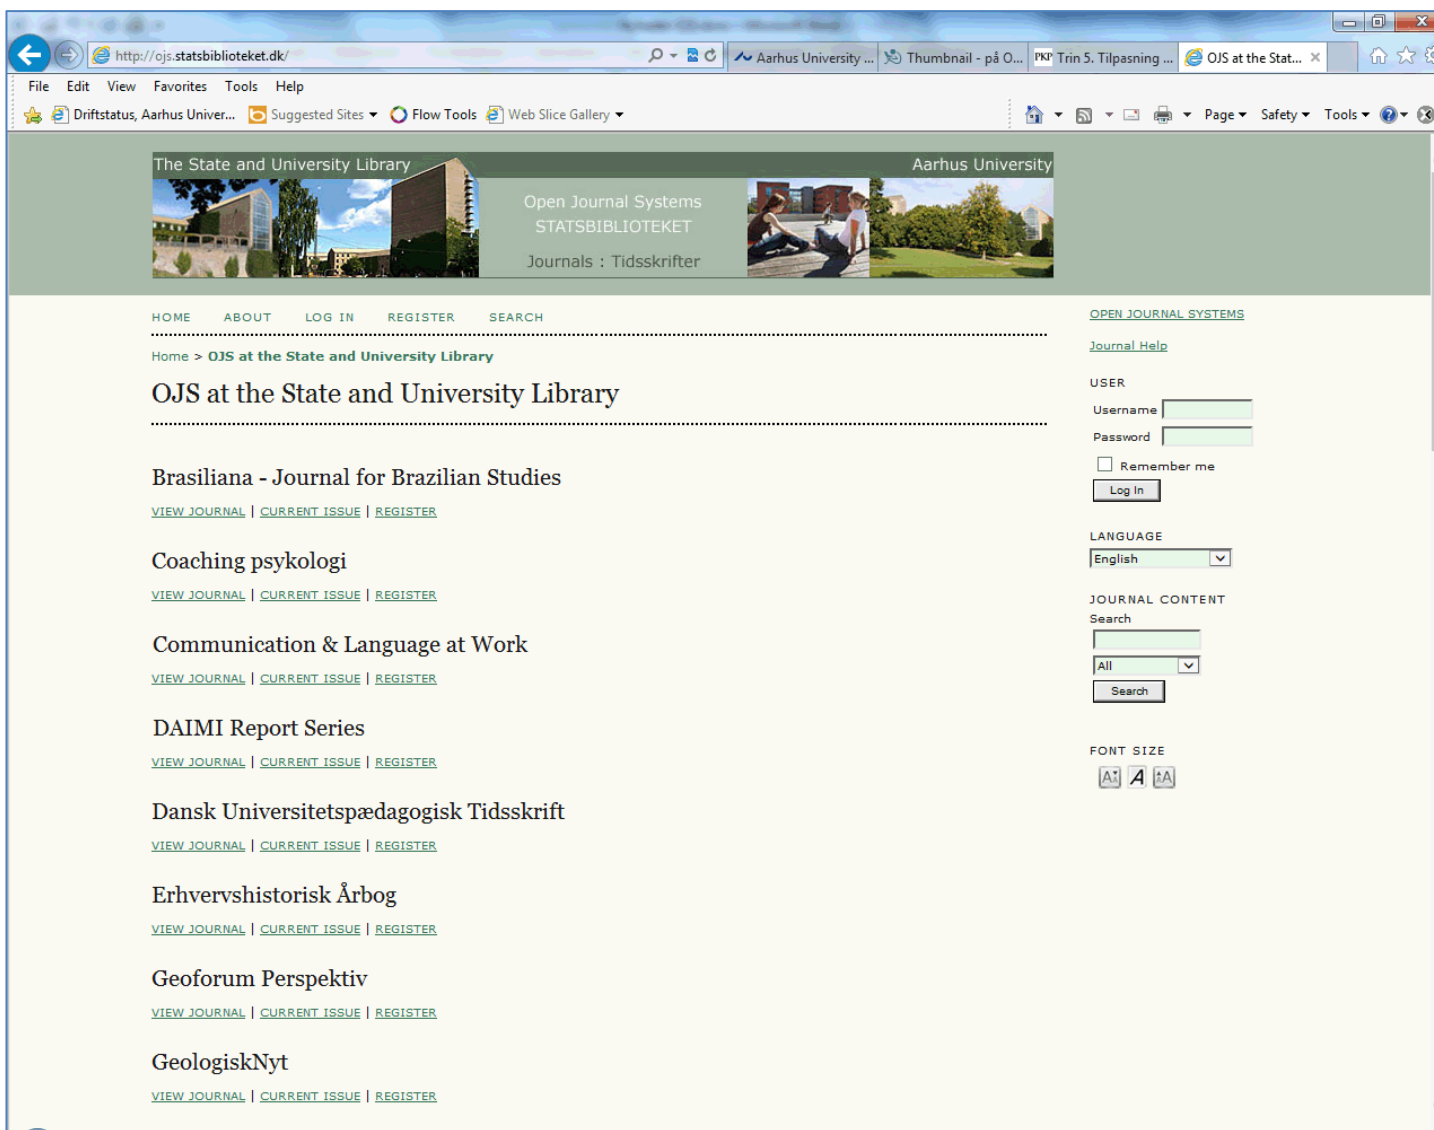

Journal Description

Add a brief 20-25 word description in text/HTML which will appear just below the navigation links.

Figur 13: Indsættelse af thumbnail ("Forbudt område" gælder også Journal Description-feltet)

Vi bestræber os på at bevare det enkle og overskuelige på vores fælles indgangsside:

Figur 14: Fælles indgangsside på <http://ojs.statsbiblioteket.dk>

7. En anden nyhed, der også relaterer sig til den fælles overordnede fremtrædelsesform, gør det muligt at opdele en servers tidsskrifter i kategorier (f.eks. Historie, Arkæologi, Sprog, Matematik osv.). I øjeblikket (oktober 2013) findes der 35 tidsskriftsindgange på Statsbibliotekets fælles OJS-side, men tallet ser ud til at skulle stige stødt, og på et tidspunkt vil det givet være hensigtsmæssigt at dele titlerne op i forskellige overordnede emneindgange. Det er der nu mulighed for, men det er naturligvis en funktion, som kun administratoren af den enkelte server har adgang til. Det sker på siden 'Site Administration' > 'Categories':
